WHO WE ARE

Busega Agricultural Company Limited (BACL) is among top agricultural companies in Tanzania, established by enthusiastic Tanzanians with an objective to create a first class integrated technology and agricultural services structure within the country.

Vision Statement:

To become the leading company that value the need of small-scale farmers to ensure food security is achieved and sustainable.

Mission Statement:

To improve food security through enhanced technology and sustainability.

WHAT WE DO

We're an agricultural company that involved in various aspects of agriculture and farming. We play a crucial role in the consultancy, technology, production, processing and distribution of food and other agricultural products.

Our key competency:
endless innovation,
creativity, great customer
service, empowerment,
partnership and diverse
mindset.

_ 1.

Agricultural Production

We are engaged in primary agricultural production, which involves growing crops and raising livestock.

We do cultivate a wide range of crops in different parts of Tanzania, including modern growing of cassava, grains (wheat, rice, corn), vegetables, fruits, and oilseeds.

Our livestock farming projects involve raising cattle, poultry, pigs, and other animals for meat, dairy, and other products.

_ 2.

Agribusiness

We provide essential tools and technology to support farmers in their operations.

BACL do venture into agribusiness, and this encompasses a broad spectrum of activities, including agricultural machinery pre-purchase recommendations, agricultural chemicals and inputs (such as fertilizers, pesticides), irrigation systems, and seed production.

The values we live by:
care for the environment,
shared compassion,
integrity, transparency,
teamwork, innovation.

_ 3.

Food Processing and Distribution

We're also involved in food processing and distribution. We take raw agricultural products and convert them into value-added food items or ingredients. Our food processing part include activities such as milling, canning, freezing, and packaging.

Then, we participate in the distribution and logistics of agricultural products to retailers, wholesalers, and consumers.

_ 4.

International Trade

Busega Agricultural Company Limited (BACL) is also engaged in international trade. We export agricultural products to abroad countries and import goods that are not locally produced. The BACL international trade is crucial for ensuring food security and meeting global demand for diverse agricultural products.

Our promise is to deliver optimistic, consistent and measurable services, and connect with our stakeholders on a deeper emotional level.

WHY BACL?

Observe strong and professional reasons here down, why you better choose us;

DEPLOYMENT OF ADAPTIVE STRATEGIES

Agricultural projects face various challenges, including unpredictable weather patterns, pests and diseases affecting crops and livestock, market fluctuations, and regulatory compliance. Climate change also poses a significant threat to agricultural operations and requires adaptive strategies.

SUSTAINABILITY AND INNOVATION

With increasing concerns about environmental sustainability and resource conservation, BACL is focusing on sustainable farming practices. This includes implementing efficient water management, adopting organic or regenerative farming methods, and utilizing precision agriculture techniques to optimize resource use.

RESEARCH AND DEVELOPMENT

On its agricultural projects, BACL invests in research and development to improve crop yields, enhance livestock genetics, and develop new agricultural technologies. This research helps BACL in creating more resilient and productive agricultural systems.

Our CSR initiatives:
support local communities,
engage in sustainability
projects, and promote
responsible agricultural
practices.

“

At **BACL** we're having a dedicated team of experts working around the clock to make sure that our customers get the best products, information, project management and top-notch technical services, which they need to become more profitable, better informed and competitive for all their agricultural business cycle.
